

When it comes to administering the Fed’s dual monetary policy mandate of maximum employment and low/stable prices, policy makers are finding themselves caught between a rock and a hard place! Over the last several years, the Fed has primarily focused its policy response on battling high inflation as employment has been mostly steady – largely driven by a healthy economy. Unfortunately, risks to the economic outlook have increased evidenced in recent economic data. Consumer Confidence fell in February with the Expectations component now signaling recession. Last month’s ISM manufacturing Employment and New Order index both falling into contraction territory. Consumer credit card debt continues to increase and with an average rate of 22.8%, delinquencies are steadily increasing. As for car loans, delinquencies of non-revolving debt have increased to levels not seen in thirty years. All this weighs on consumer spending – the driver of overall economic growth. According to the latest Atlanta Fed’s GDPNow forecast, the economy is now expected to *contract* 2.41% this quarter vs. its 2.32% *expansion* expectation just two weeks ago.

Driven by above-target inflation and the increased possibility that a slowing economy could result in job losses, investors are becoming fearful that the economic cycle may be entering the stagflation stage. If so, it will be difficult for the Fed to achieve their dual mandate as attempting to correct one imbalance exacerbates the other. Above target inflation &/or increased inflation expectations generally requires policy makers to keep benchmark rates in restrictive territory (higher for longer). But doing so comes with the risk of increased job losses as the economy generally slows. Conversely, a slowing economy – one which results in job losses – normally warrants an easier policy response. But reducing benchmark rates could drive prices higher. If we do enter a cycle of stagflation, the Fed will likely have to address the greater of two evils as there is no easy way to fix both.

Dennis Zimmerman Jr.  
 Senior Vice President  
 Senior Manager – Asset/Liability Services  
 Commerce Bank – Capital Markets Group (CMG)
