

KnowScam™

Video Transcript

In today's digital age, scams are becoming increasingly sophisticated and dangerous, targeting every one of us through various channels.

We've all received communications that make us question their legitimacy.

As these scams grow more powerful, it's crucial to have a fast, easy, and effective way to stay safe.

That's where the KnowScam app comes in.

With its patent pending capabilities, KnowScam has everything you need to identify scams before you fall for them.

Did you know that the average consumer, like yourself, encounters five point eight scams per day, all without any reliable way to determine their legitimacy?

What if you disregard an important communication simply because you doubt its authenticity?

This is why one of our key features, scan and score, is so pivotal. It delivers automated AI powered scanning of your communications, including emails, text messages, social media DMs, QR codes, website links, and even physical mail to accurately separate authentic communications from scams.

You can configure scan and score to run automatically for 24/7 monitoring or to perform checks only when you encounter something suspicious.

KnowScam provides you with the power to determine if the communications you receive are legitimate or not. The choice is yours.

Ever met someone online, like on a dating site or when purchasing something in a marketplace, and you weren't sure if they were who they claimed to be? Imagine you're looking to buy concert tickets online from a seller or maybe going out on a first date with someone you recently met in an app. Before sending a payment or attending that first date, you can quickly verify the person's identity with ID everyone. Within seconds, you'll receive a real time confirmation of their identity right in the app.

In just a few easy steps, you can know exactly who you're dealing with while respecting the privacy of both parties. And you can do it all practically anywhere in the world, ensuring your ability to verify the identity of the other party before proceeding with any payment or sharing of sensitive information. If you don't know where to start or have a question about a potential scam, just contact our scam hotline staffed by Department of Justice trained agents who work tirelessly before or after a scam event to answer any questions or concerns. And if victimized, we help to restore your peace of mind.

When it comes to scam protection, no one has your back like KnowScam.
